

DIBBLE'S PRICE LIST

from

Edward F. Dibble Seedgrower, Honeoye Falls, N.Y.

March 9, 1959

To our customers and friends:

After every storm the sun will shine.

We are sending you Dibble's latest Price List offering the highest quality of Farm Seeds that can be obtained and varieties that are adapted to our Northeastern farms.

For 68 years the Dibble motto has always been, **"Farm Seeds and Farm Seeds only; One Grade and That the Best Obtainable at the Lowest Price Consistent With the Highest Quality"**.

We can ship all seeds except potatoes at once, and can hold potatoes until weather conditions are favorable, or we will book your order to be called for at our warehouse.

The policy of our company is plain and simple — to furnish Farm Seeds that we are proud to sow ourselves.

Planting time will soon be here. Now is the time to send in your order.

Sincerely yours,

EDWARD F. DIBBLE SEEDGROWER

Harwood Martin

HARWOOD MARTIN, PRESIDENT

Conditions of Sale

We assume responsibility that the seeds or tubers reach the purchaser in good condition. We offer to refund the purchase price of any seeds or tubers found by tests to be unsatisfactory to you within ten days after the seeds or tubers reach you. In common with all responsible seedmen "The Edward F. Dibble Seedgrower Company warrants to the extent of the purchase price that seeds or tubers sold are as described on the containers within recognized tolerances. Seller gives no other or further warranty express or implied."

ALFALFA SEED

NARRAGANSETT

NARRAGANSETT ALFALFA is a new Northeastern-bred variety which has the widest soil and management adaptation of any alfalfa recommended for the Northeast.

On soils of marginal drainage for alfalfa - Narragansett, compared with other varieties, establishes better stands that live for years.

Narragansett, if properly limed and fertilized, can extend successful alfalfa production to many farms with moderately drained soils. 15 lbs. per acre if seeded alone.

Mixture for Hay, Silage or Pasture

Narragansett Alfalfa	6 lbs. or 3 qts.
Viking Birdsfoot Trefoil	4 or 2
Timothy (pref. Climax)	6 or 4
TOTAL for one acre	16 lbs. or 9 qts.

RANGER

RANGER ALFALFA, a long-lived Alfalfa, is highly resistant to bacterial wilt. It is winter hardy and is therefore well suited to our Northeastern conditions where a long-lived stand is desired. We recommend Ranger as the variety to use where wilt may be a factor, and if you wish to leave the seeding for a period of several years.

VERNAL

VERNAL ALFALFA, is a high-yielding winter-hardy, wilt resistant variety that was developed in Wisconsin. Recommended for the same conditions as Ranger, or as a substitute for Narragansett. VERNAL may replace Ranger when ample seed supplies are available.

DU PUIITS

DUPIITS ALFALFA, is of French origin and the highest yielding variety on the fertile soils of the Northeast for stands up to three years. Dupuits starts growth earlier in the spring, recovers faster and continues growth later in the fall than other recommended varieties. On three cuttings (starting late May or early June) over five tons per acre may be expected. Successful stands of Dupuits have been established on soils of moderate drainage.

COMMON

COMMON ALFALFA, may be used on natural Alfalfa soils of the East where Common Alfalfa has grown successfully and and where it is to be left down only two or three years.

DIBBLE'S *Garry Oats*

High Yielding Variety for the Northeast.
The Most Promising New Oat.

The new Garry Oat originates from the Dominion Laboratories at Winnipeg, Canada and this is the fourth year that seed has been available to our Northeast farmers.

The Garry Oat combines in one variety the following desirable features:

1. High yielding ability.
2. Very stiff straw.
3. Medium height.
4. Medium early maturity.
5. High resistance to crown and stem rust.
6. Plump, meaty kernels.

The Garry Oat has exceptional stooling ability and maximum yields may be obtained by planting 2 bushels per acre.

DIBBLE'S RODNEY

Rodney, a Canadian-bred oat has proven to be a very desirable Oat for our Northeast territory. Rodney yields about the same as the new Garry and has about the same height and stiffness of straw. It is five days later than Garry and has a very heavy kernel. Sow 2 to 2½ bushels per acre.

DIBBLE'S HEAVYWEIGHT

Dibble's Heavyweight Oats have made wonderful yields for a large number of our customers in many states. We read of remarkable records and big yields of Oats in the western states, under irrigation, but right here in the East Dibble's Heavyweight Oats have produced record-breaking crops. Average weight 40 lbs. per measured bushel.

This Oat is of the Swedish type and being generations from the original importation, the law requires us to use the words "variety unknown." Sow 2½ bushels per acre.

Maturity Guide

FOR DIBBLE'S SEED CORN

EARLY N. E. 310
100 to 110 days Michigan 250

Mainly for grain production in New York State above elevations of 600 feet and early to medium seasons of the Northeast. Excellent for early silage producers.

MEDIUM Cornell M-4
110 to 115 days Penn. 444

For grain in the good growing sections of western New York State and similar seasons of the Northeast. Excellent yields for silage at elevations around 800 feet in New York State and similar seasons of the Northeast.

MEDIUM LATE Ohio K-62
115 to 125 days Ohio K-24

Extremely heavy silage producers for the good Corn-growing dairy sections in New York State and the Northeast. For grain in the best Corn-growing sections of the Lower Hudson, Long Island, Pennsylvania, New Jersey and Connecticut.

LATE West Branch Sweepstakes
130 days Leaming
Lancaster County Sure Crop

Open-pollinated varieties that produce high yields of silage in the best growing sections of the Northeast.

MATERIALS FOR SEED TREATMENT

NODOGEN

The Pre-Tested Inoculator

Use NODOGEN on all legumes.

1. Bigger crop yields (10 to 50%).
2. Build more protein in hay and forage
3. Add valuable nitrogen to your soil.

When ordering Nodogen, specify kind of seed to be inoculated.

½ lb. Seneca Chief	86 days	

Plant all three at the first planting and then follow with Seneca Chief at weekly intervals.

SENECA BEAUTY, SENECA CARMELCROSS, SENECA CHIEF.

1-4 lbs. \$1.05 per lb., 5-9 lbs. 80c per lb., Prepaid,
10-19 lbs. 75c per lb., Prepaid.
20 lbs. or over 65c per lb., Not Prepaid.

HAY and PASTURE MIXTURES

BIRDSFOOT TREFOIL MIXTURES

FOR HAY, SILAGE OR PASTURE

Birdsfoot Trefoil	7 lbs. or 3½ qts.
Timothy	5 lbs. or 3½ qts.
Total for 1 acre	12 lbs. or 7 qts.

This mixture is suitable for long rotations and for areas to be left continuously in hay or pasture. It is recommended only where the seeding is to be left down for three years or longer.

Empire Trefoil is first choice for long-term stands on acres difficult to plow or for continuous grazing. It will also cut high-quality hay from 10 to 20 days later than Red Clover or the European type.

European or Viking Trefoil is better suited for hay and may be used for rotated pastures. Hay yields higher than Empire and matures at time of Red Clover; establishes itself quicker and recovers faster after cutting.

FOR FIELDS WITH SPOTTY DRAINAGE

Narragansett Alfalfa	6 lbs. or 3 qts.
Viking Birdsfoot Trefoil	4 lbs. or 2 qts.
Timothy (preferably Climax)	6 lbs. or 4 qts.
Total for one acre	16 lbs. or 9 qts.

ALFALFA MIXTURES

FOR HAY, SILAGE OR PASTURE

Alfalfa	4 lbs. or 2 qts.
Medium Red Clover	4 lbs. or 2 qts.
Ladino Clover	1 lb. or ½ qt.
Timothy	6 lbs. or 4 qts.
Total for one acre	15 lbs. or 8½ qts.

The proportion of Alfalfa should vary from 6 to 2 pounds according to how favorable the situation is for Alfalfa. As the Alfalfa is reduced, the Clover should be increased correspondingly.

Eight pounds of Brome Grass, sown separately, may be used in place of Timothy when most of the soil is well drained.

FOR HAY OR SILAGE

Alfalfa	8 lbs. or 4 qts.
Timothy	6 lbs. or 4 qts.
Total for one acre	14 lbs. or 8 qts.

Timothy is more easily and quickly established than Smooth Brome Grass on land that is not in a high state of fertility.

FOR HAY OR SILAGE

Alfalfa	8 lbs. or 4 qts.
Smooth Brome Grass	8 lbs. or 18 qts.
Total for one acre	16 lbs. or 22 qts.
